About me

I am a motivated and detail-oriented undergraduate specializing in Electronic and Telecommunication Engineering, driven by a passion for cutting-edge technologies like Machine Learning, Computer Vision, Blockchain, and Software Development. With a strong academic background and hands-on experience, I am eager to push the boundaries of innovation and contribute to impactful solutions in the tech industry.

Skills

Technical Skills Machine Learning, Image Processing, Pattern Recognition, Object-Oriented Programming, Web Development, Blockchain
Programming Languages Python (*Proficient*), C++ (*Intermediate*), MATLAB (*Beginner*), Java (*Beginner*), JavaScript (*Beginner*), C# (*Beginner*)
Frameworks & Tools VSCode, Git, Colab, Kaggle, AWS, Docker, MongoDB, Spring Boot, Node.js, Linux, Unity, Altium Designer, SOLIDWORKS
Communication Skills English (*Professional Proficiency*), Sinhala (*Native Proficiency*)

Education

University of Moratuwa 2021 – Present

B.Sc. Eng. Hons. in Electronic and Telecommunication Engineering

- **CGPA:** 3.89/4.00 (After 6 semesters) — **Dean's List:** Semester 1, 2, 4, 5, 6
- **Minor:** Mathematics (Following)

Related Coursework:

- Applied Statistics (A+) — Calculus (A) — Data Structure and Algorithms (A)
- Numerical Methods (A+) — Software Design Competition (A+) — Digital Signal Processing (A)
- Linear Algebra (A+) — Pattern Recognition (A+) — Neural Network and Fuzzy Logic (A+)
- Differential Equations (A+) — Digital Signal Processing (A) — Deep Learning for Vision (A)

Sri Bodhiraja College, Embilipitiya 2006 – 2019

G.C.E Advanced Level Examination

- Z-Score: 2.3895 — Island Rank: 269 — District Rank: 10
- 3 As: Combined Mathematics, Physics, Chemistry

G.C.E Ordinary Level Examination

- 9 As (English Medium)

Other Courses

- Java Object-Oriented Programming Jan 2025
- AWS Certified Solutions Architect Associate (SAA-C03): Udemy Course Dec 2023
- LSEG CPP Course Oct 2023

Experience

LiveRoom Pvt Ltd Nov 2023 - Aug 2024

Trainee Software Engineer

- Contributed to the design, development, and testing of scalable server-side applications.
- Focused on implementing blockchain-based solutions, ensuring reliability and performance.
- Gained hands-on experience in backend development, including database management, API integration, and server-side optimization.
- Collaborated effectively with cross-functional teams, enhancing project outcomes through clear communication and teamwork.

Industrial Training Project: Kaiju Wallet

- Developed a multi-blockchain SaaS wallet application, specializing in wallet creation and transaction signing using Python and Node.js.
- Contributed to architectural design with a focus on security and scalability.
- Utilized AWS cloud infrastructure for deployment and management.
- Conducted load testing and performance optimization to enhance application efficiency and reliability.
- Used GitLab for version control to manage codebase and streamline collaboration.

Projects

Enfluent: Personalized Language Learning through Adaptive Learning Management Systems

Ongoing

- The Enfluent project aims to revolutionize personalized language learning for IELTS students by integrating features such as an automated grading system for reading, writing, listening, and speaking according to IELTS criteria, interactive avatars, and engagement detection using IoT data.
- The development leverages technologies like Java Spring Boot and Python FastAPI for backend, React.js for frontend, PostgreSQL and MongoDB for databases, Expo framework for app development, and Git for version control.

Power Zoo Game

Jan 2024 – June 2024

- Power Zoo is an educational game that immerses players in a virtual zoo environment while promoting energy conservation through interactive gameplay and quizzes.
- The project features a React.js frontend, a backend powered by Java Spring Boot, MongoDB for data management, and Git for version control.
- The game was developed using Unity to provide visually engaging and interactive simulations.

Brain Tumor Segmentation

Nov 2023

- Developed a model to detect brain tumors and automatically label their types.
- The project was implemented using Python, leveraging machine learning techniques for accurate tumor segmentation

LSEG Coding Competition

Sep 2023

- Designed a trading app for exchanging five variances of flowers.
- The app was implemented in C++ using Object-Oriented Programming (OOP) concepts.

Other projects

- Smart Time Stamp Recorder
- Digital Volt-Amp meter
- Five Band Audio Equalizer
- Maze Following Robot
- Multi-functional Lamp

May 2024

July 2023

Feb 2023

Jan 2023

Oct 2022

Acheivements

- Achieved **1st Runner-Up** in the **VRCode Competition** as part of a 3-member team.
- Secured a position in the **Top 3 Teams** at the **LSEG Coding Competition**
- Participated in the **IEEEExtreme 17.0 Programming Competition**

Dec 2024

Oct 2023

Oct 2023

Extra-curriculars

University of Moratuwa

- Treasurer of IEEE ComSoc Branch
- Member of Eclub
- Assistant Treasurer of IEEE ComSoc Branch
- Project Demonstrator at EXMO: Demonstrated Analog Project
- Committee member of IEEE ComSoc Branch

2024 - Present

2022 - Present

2023 - 2024

2023

2022 - 2023

Sri Bodhiraja College

- Deputy Head prefect
- Senior prefect

2016

2014 – 2016
